

Chris Cornell?

I just stumble into this:

My first impression was: WTF???!!!! I was used to listening to [Cornell](#) in Sound Garden, Audioslave or in his Album [Euphoria Morning](#), but this is the shittiest change that I have seen ever. I was told to visit his [web page](#), a request made from [Gerardo Curiel](#), maybe with the hope that that had been a joke, but When I went there... it was real... Chris Cornell had become in a kind of Justin Timberlake :S

What should I expect now? Deftones doing something like this?:
